👤 PROFILE

Full Stack Developer (JavaScript, Python, Java) with 8 years commercial experience delivering and supporting customer-facing web applications. Python specialist with hands-on experience building Django/Flask services, integrating APIs, and operating AWS-hosted systems with strong observability (Datadog) and CI/CD. Comfortable owning production issues end-to-end, collaborating with Product, and working in agile teams with estimates and code reviews.

📁 EMPLOYMENT HISTORY

Full Stack Software Developer at GenderGP, Remote

April 2026 — Present

- Built and maintained mission-critical healthcare web applications using JavaScript, React, Python, and REST APIs.
- Developed user-facing portal, onboarding, and admin features supporting access to gender-affirming healthcare.
- Delivered high-priority fixes across authentication, verification, payments, password reset, localisation, and account setup flows.
- Worked across frontend and backend-integrated systems, debugging API behaviour, user data issues, and production/staging defects.
- Improved international user journeys across UK, US, and Brazil platforms, including routing, translations, and country-code handling.
- Contributed to reusable, modular, and accessible UI patterns with a focus on clean UX and reliable deployment.
- Collaborated with product, QA, design, and engineering teams to turn requirements into production-ready features.
- Worked with React, JavaScript/TypeScript, Python, REST APIs, Docker, CI/CD pipelines, cloud-based systems, and healthcare technology.

Software Developer at Bennett Brooks, Manchester

December 2025 — April 2026

- Develop and maintain internal business systems and client-facing web solutions using PHP, JavaScript, WordPress, C#, and Python scripting where appropriate.
- Build low-code applications with Power Apps and automate operational workflows using Power Automate, reducing manual admin and improving data consistency.
- Create scripts and tooling to support reporting, data processing, and day-to-day operational tasks across teams.
- Manage deployments and release cycles across environments, ensuring reliable delivery and quick rollback/fix when needed.
- Troubleshoot production issues end-to-end (application, integrations, and environment), providing clear updates to stakeholders and implementing permanent fixes.
- Contribute to continuous improvement by refactoring legacy components, improving performance, and strengthening documentation.

Software Developer at The Travel Corporation, London

April 2021 — November 2025

- Delivered full-stack features for customer portals (React + Python), from UI through API integration, within agreed estimates and deadlines.
- Built accessible, consistent UI components and improved front-end performance and maintainability across multiple brands.

- Developed Python (Django/Flask) services and automation for integrations and reporting; became the team's go-to Python specialist.
- Tech stack:
 - Python (Django/Flask), JavaScript (ES6+), React, HTML/CSS
 - Real-time: WebSockets; Stream Chat
 - APIs: REST; GraphQL (Apollo Client)
 - Data: SQL Server; working knowledge of PostgreSQL
 - Cloud/DevOps: AWS, Docker, Git, CI/CD (TeamCity), Datadog
 - Owned production support: investigated incidents using Datadog, delivered fixes quickly, and improved monitoring and documentation to prevent regressions.
 - Maintained and extended legacy PHP back-end services supporting core booking and customer platforms, implementing new features and resolving production issues.
 - Designed and optimised Microsoft SQL Server queries and stored procedures (including complex joins and aggregations) to improve page load times and reduce timeouts on high-traffic applications.
 - Created and refined SQL scripts for data fixes, adhoc reporting and small-scale migrations, helping customer support and stakeholder teams quickly resolve data-related incidents.

Data Analyst/Salesforce Administrator at The Travel Corporation, London

October 2017 — April 2021

- Provided CRM support to clients to ensure the smooth operations of the business's day to day processes
- Conducted daily stand-up sessions, ran training sessions for Salesforce admin
- Worked with teams abroad and managed communications

Accountant Administrator Assistant at Herts Heritage Building and Roofing, London

August 2016 — October 2016

- Accounting and administration duties - managed invoices, managing work specs and other admin duties

EDUCATION

MSc Applied Neuroscience (part-time), King's College London, London

September 2025 — Present

BSc (Honors) Psychology, Open University, London

October 2021 — July 2025

Software Development Level 4 Apprenticeship, Avado/Arch Apprenticeships, London

March 2020 — October 2021

Software Development Level 3 Apprenticeship, Step Forward, London

June 2017 — January 2019

GCSE - 12 A-Cs including English and Maths, The Petchey Academy, London

September 2010 — September 2015
